Forecast for Sunday 02 Jul 2023

Weather: A fine day with periods of sunshine and cloudier spells. Conditions likely remaining clearest in the east. More in the way of cloud developing during the afternoon with an outside chance of the odd light shower. Clear spells expected through the evening and overnight. Feeling cooler at height in the brisk winds.

Chance of cloud-free hill tops above 600m: 90% throughout.

Low cloud and visibility: Scraps of cloud are possible across western hills around 700m at first, otherwise cloud is expected to remain above the summits. Generally excellent visibilities with superb air clarity and excellent distant views. There is a slight chance of visibilities dropping temporarily to moderate in any showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Windy conditions, especially during the afternoon, will make for fairly arduous walking, particularly across exposed or elevated routes and east of major ridges. High UV levels so sun protection recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Monday 03 Jul 2023

Weather: Sunny spells early on. Cloud soon increasing from the west, with an area of rain and showers pushing across the park by late morning before clearing to leave a brighter afternoon with some well scattered showers. Rain and showers likely turning heavy at times, possibly merging to give longer spells of rain or some potentially thundery downpours. Chance of further cloud and rain arriving in the south of the park through the evening and overnight.

Maximum wind: West winds 25-35mph, gusting 35-45mph across the highest peaks.

Chance of cloud-free hill tops 600m: 80%, falling to 40% in the west in rain or showers. 50% across the south late on.

Low cloud and visibility: Scraps of early cloud perhaps just shrouding some higher peaks. Cloud soon lowering and thickening, with bases of 400-500m extensively and especially around heavier showers. Bases of 500m possible again late on in the south, but this is low confidence. Visibility very good, but dropping frequently to poor in rain and showers.

Temperature: **Valleys:** Plus 10 Celsius rising to plus 17 Celsius.
At 600m: Plus 06 Celsius rising to plus 11 Celsius.
Freezing level: Well above the summits.
